1. Change the profile pictures of the users.

```
// Ex1: Import the images
import userProfilePic1 from './img/1.png';
import userProfilePic2 from './img/2.png';
import userProfilePic3 from './img/3.png';
import userProfilePic4 from './img/4.png';
// This array holds information about different videos
const videoUrls = [
  {
    url: require('./videos/video1.mp4'),
    profilePic: userProfilePic1, // Ex1
    username: 'csjackie',
    description: 'Lol nvm #compsci #chatgpt #ai #openai #techtok',
    song: 'Original sound - Famed Flames',
    likes: 430,
    comments: 13,
    saves: 23,
    shares: 1,
  },
  {
    url: require('./videos/video2.mp4'),
    profilePic: userProfilePic2, // Ex1
    username: 'dailydotdev',
```

```

{
  url: require('./videos/video2.mp4'),
  profilePic: userProfilePic2, // Ex1
  username: 'dailydotdev',
  description: 'Every developer brain @francesco.ciulla #dev',
  song: 'tarawarolin wants you to know this isnt my sound -',
  likes: '13.4K',
  comments: 3121,
  saves: 254,
  shares: 420,
},
{
  url: require('./videos/video3.mp4'),
  profilePic: userProfilePic3, // Ex1
  username: 'wojciechtrefon',
  description: '#programming #softwareengineer #vscode #prog',
  song: 'help so many people are using my sound - Ezra',
  likes: 5438,
  comments: 238,
  saves: 12,
  shares: 117,
},

```

2. Add a button in FooterRight to mute and unmute the video when clicked.

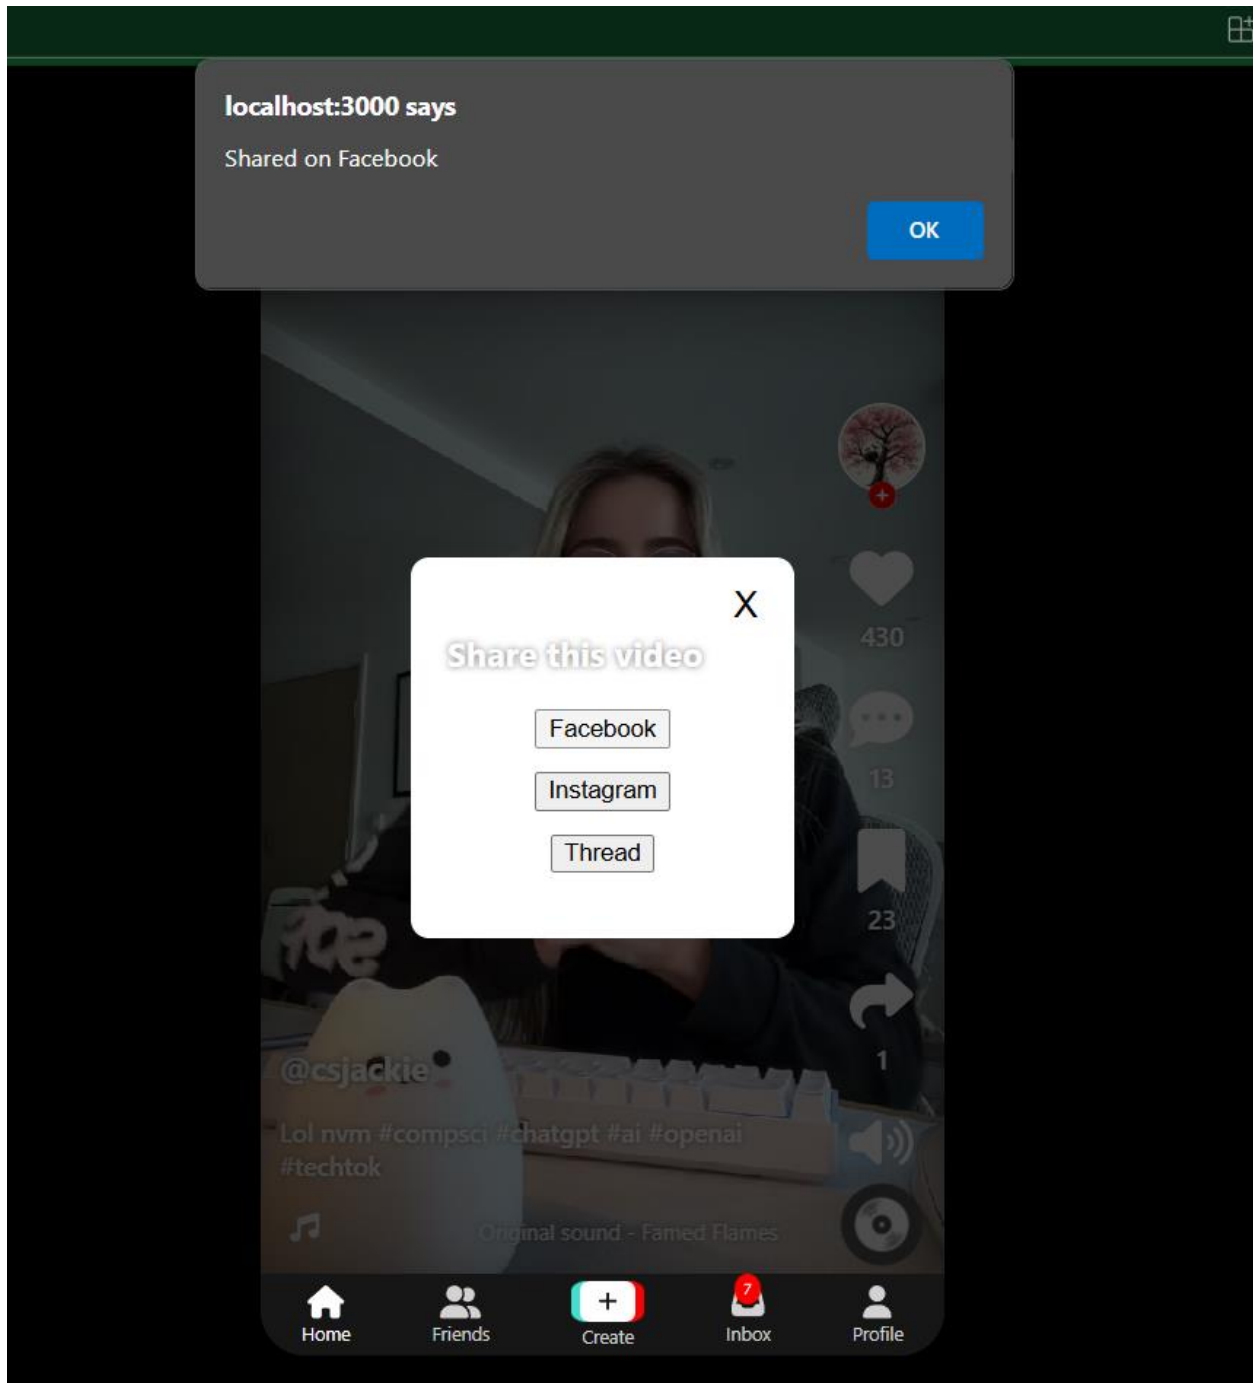

3. Our application currently cannot hold the mouse and moving up or down navigates to the next or previous video, add this functionality.
4. When selecting the 'Save' button, automatically copy the video URL.

Even though the URL is copied, but it will give you the “undefined” when you paste it – maybe for the security issues.

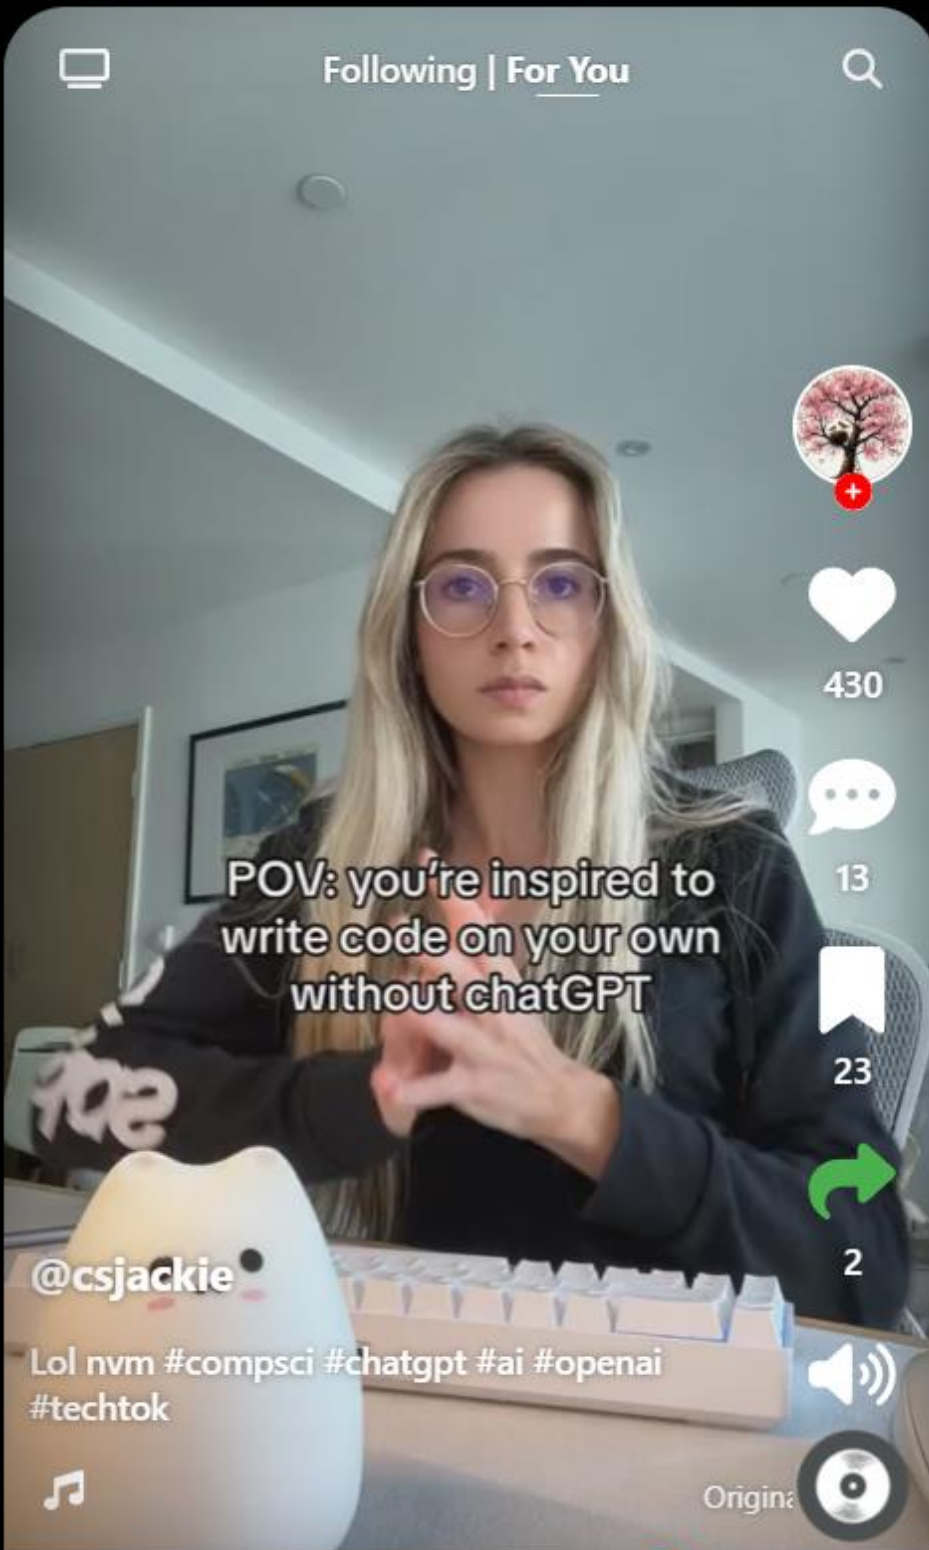

5. Create a custom User interface. When scrolling or pressing the right arrow key, it should display the video upload information (similar to TikTok).
6. When selecting the 'Share' button, a popup will appear with options to share on Facebook, Instagram, Thread (only visible). Press the X button to close it. \*
